Experience

Smart India Hackathon

Full Stack Developer, Team Leader

Ghaziabad, UP

Oct 2025– Dec 2025

- Built a full-stack student platform using **React.js**, **Node.js**, **Express.js**, and **MongoDB**, implementing secure **REST APIs**, authentication, and role-based access control.
- Integrated **OpenAI GPT-3.5** to generate AI-powered ATS-friendly portfolio summaries using dynamic prompt engineering and resilient fallback workflows.
- Led a team of developers to deliver scalable frontend, backend, and AI features for the SIH solution.
- Collaborated with UI/UX and backend teams for rapid integration.

Spineor Web Services

Frontend Developer Intern

Aug 2025

- Revamped **React.js** frontend improving responsiveness and engagement.
- Improved **SEO** using React Helmet and semantic HTML.
- Integrated **REST APIs with backend services**.

Projects

Multi-Agent Research System | LangChain, LCEL, Streamlit | [Github/Live](#)

2026

- Built a **multi-agent research pipeline** with Search, Reader, Writer, and Critic agents that pass state through a shared workflow to generate structured research reports.
- Designed **LCEL-based orchestration** and custom tools enabling agents to perform live web search and deep content extraction from URLs.
- Implemented a Critic agent to automatically review and score generated reports, improving output reliability.
- Developed a **Streamlit interface for end-to-end interaction**, from query input to final report generation.

AI-Powered Pull Request Review Agent | LangGraph, Redis, PostgreSQL | [Github](#)

2026

- Built a **production-grade multi-agent code review system** combining retrieval, orchestration, confidence scoring, and **human-in-the-loop approval**.
- Implemented **semantic, episodic, and procedural memory layers**, enabling the agent to reason over past reviews and codebase context.
- Created an **event-driven workflow** using **GitHub webhooks and Redis** queues, backed by **PostgreSQL** for scalable data access.
- **Orchestrated the multi-step review pipeline** (parsing → retrieval → analysis → scoring → approval) using **LangGraph** with full observability.

Student Hub | React.js, Express.js, MongoDB, OpenAI API | [Github](#)

2026

- Engineered a **full-stack academic platform using the MERN stack**, supporting role-based dashboards, student activity man-agement, and real-time data updates.
- Integrated **OpenAI GPT-3.5** to **automate professional portfolio summary generation** using dynamic prompts, improving portfolio quality and ATS readiness.
- Built a **scalable AI-backed portfolio generation workflow** with secure APIs, automated PDF generation, and fault-tolerant retry/fallback mechanisms.

Skills

AI/LLM: LangChain, LangGraph, RAG, Multi-Agent Systems, Prompt Engineering, LLMs, Vector Database

Web: React.js, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, Tailwind CSS

Languages: Python, C++, Java, JavaScript, SQL

Soft Skills: Leadership, Teamwork, Communication, Adaptability

Achievements

- Top 50 teams in Smart India Hackathon (College Level).
- Coordinated Freshers Party and Blood Donation Camp.
- Best Orator at IIT Roorkee MUN.

Education

Ajay Kumar Garg Engineering College

Oct 2023 – June 2027

B.Tech in Computer Science and Information Technology (CGPA: 7.01)

Delhi Public School, Bulandshahr

June 2022

Intermediate – 96%
